State Notes:

2a Overall:

2b Overall:

5a Overall: Minnesota can't distinguish between clients who are Medicaid only and clients who receive services paid for by both Medicaid and non-Medicaid sources. Also, Minnesota doesn't allow for the selection of multiple races at this time, nor do we break out Native Hawaiian or Other Pacific Islander from Asian.

5b Overall: People counted in "People served by both Medicaid and non-Medicaid sources" have received at least 1 Medicaid -Paid MH service.

- 15 These data are calculated based on responses to a statewide random sample survey and the number of people in Minnesota's public mental health community programs. Crisis residence number is included with the number in Residential Care. Jail/Correction Facilities are not included in the SMHA and are not counted. In addition, Minnesota does not get data from homeless shelters. Institutional Setting numbers are actual counts of people in state hospitals.

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

These data are calculated based on responses to a statewide random sample survey and the number of people in Minnesota's public mental health community programs. Crisis residence number is included with the number in Residential Care. Jail/Correction Facilities are not included in the SMHA and are not counted. In addition, Minnesota does not get data from homeless shelters. Institutional Setting numbers are actual counts of people in state hospitals.

Mental Health Adults in Labor Force is the sum of MH consumers employed plus unemployed.

Adults Served in Community excludes persons for whom employment status was unknown.

MH Consumers Employed as % of Total Adults Served uses Adults Served as the denominator.

MH Consumers Employed as % of Adults served in Labor Force uses persons employed or Unemployed as the denominator.

This data is calculated using the statewide random sample survey for percentages and tbl. 3A for the total number of people served in each group. "Total" for 4 does not equal "Total" for 3A because we could not estimate the numbers where age and/or gender was not available. Surveys in the sample had age and gender completed.
